

A WETTABLE POWDER INSECTICIDE FORMULATION FOR SURFACE RESIDUAL SPRAY USED TO CONTROL MOSQUITO VECTORS WITH PROVEN ACTIVITY AGAINST RESISTANT STRAINS.

General Information:

2GARD is a long-lasting wettable powder for the control of malaria vectors, flies, cockroaches, bedbugs, fleas, fish moths, mosquitoes, ants, and other pests in domestic and public buildings. 2GARD has low toxicity and spray mixture is colourless and odourless and can be used indoors or outdoors, in and around homes, factories, hotels, shops, food handling and processing establishments, hospitals, schools, dairy parlours, piggeries, stables, poultry houses, dog kennels, refuse dumps and similar places where high levels of hygiene are required.

All persons and domestic animals should be kept outside during spraying. Foodstuffs, cooking utensils and furniture should be removed prior to application, or if not possible to remove, cover them with impermeable plastic sheeting.

Equipment- This product is best applied using a hand-held compression sprayer complying with WHO specifications, fitted with a flat fan nozzle (e.g. 8002E) under low to medium pressure.

Method of Application

Half-fill the tank with clean or filtered water. Tear off one end of the outer sachet. DO NOT OPEN THE INNER SACHET IF THE POUCH CONTAINS A WATER SOLUBLE BAG WITHIN. Remove inner sachet and place it directly into the sprayer tank. In case of packages without water soluble bag, empty the contents directly into the sprayer with water and agitate thoroughly to obtain a uniform spray mixture. Complete the filling of the tank to the approximate volume. Close the spray tank. Cover and shake vigorously 15-30 seconds

Recommended Application Dosages

Dilution Table sprayer	Water Volume	Sachet	Surface Area to be treated (m ²)
7.5 L With constant flow valve (CFV)	7.5 L	One 100g Sachet	250
10 L With constant flow valve (CFV)	10 L	One 100g Sachet	250
