Beloukha®

Bio-Suckercide

Reg. No.: 20-G-31-1

TRB Cert. No.: 20-23-G-96

A new bio-based contact suckercide

Beloukha is a contact Bio-suckercide recommended by TRB to be used in combination with a systemic suckercide for control of sucker growth in Flue-cured and Burley Tobacco.

Treated suckers die within 2-3 hours after application due to dehydration.

Beloukha does not pose any residue issues as it is rapidly absorbed by the crop and quickly broken down on contact with soil.

Application Rate:

Product	Concentration L/L water	Time of application	Volume ml/plant	Rate/Ha
Beloukha + Flumetralin 150 EC	1:133 + 1:66	At topping & 14 days later	8 cup	900ml/ha
