

Insecticide

A Broflanilide Insecticide that delivers best in class control of Fall Armyworm (*Spodoptera frugiperda*) in maize

Benefits

New Mode of Action

- With its unique MOA, **Cimegra®** is among the first compounds in the market introduced under the new IRAC group 30.
- It's a contact insecticide, which acts on the nervous system.
- There's no known cross resistance with existing products in the market, making it a superior insecticide resistance management tool.

Fast Acting, Best In Class Control

- **Cimegra®** is a fast acting compound that quickly works at all insect life stages to provide excellent, long lasting control.

Total Knockdown

- It controls pests rather than just intoxicating them, leaving them no chance of recovery.

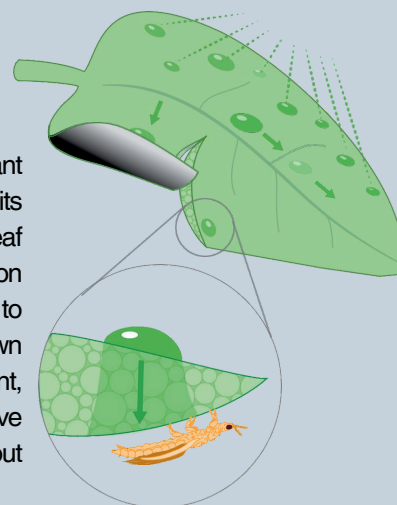

Residual control

- It offers 14-21 days of residual control.

TRANSLAMINAR MOVEMENT

A valuable and important aspect of **Cimegra®** is its ability to move across leaf tissue after a foliar application (from one side of the leaf to the other), otherwise known as translaminar movement, ensuring that the active ingredient moves throughout insect feeding areas.

Translaminar movement offers growers the ability to control targeted insect populations that may feed on the underside of the leaf, even if the product was applied on the upper side of the leaf and may not have come into direct contact with the target pest during the foliar application.

RECOMMENDED APPLICATION RATES:

CROP	TARGET PEST	APPLICATION						PHI* (DAYS)
		METHOD	TIMING (Growth DAYS) stages of crop	MAXIMUM NUMBER OF APPLICATIONS PER SEASON	INTERVAL BETWEEN APPLICATIONS (DAYS)	PRODUCT RATE (L/ha)	WATER VOLUME L/ha (MIN/MAX)	
Maize	Fall Armyworm	Foliar spray	Vegetative (1 – 6 weeks after crop germination) BBCH: 12 – 39	2	7 - 10	0.15 L	200 - 400	14

*PHI = Pre - Harvest Interval

- For foliar applications, DO NOT enter or allow worker entry into treated areas during the restricted-entry interval (REI) of 12 hours.

- No more than 2 sequential treatments and no more than a total of 50 g ai/ha per year should be applied.
