

PRIAXOR™

A systemic fungicide with protectant properties for the control of a range of diseases in maize, potatoes, soyabeans, wheat, barley & macadamias.

AgCelence® – Expect More

PRIAXOR is composed of 2 active ingredients with contact and systemic activities for the control of various tough fungal diseases.

PRIAXOR has shown superior benefits through **AgCelence®** effects –

- Improved water efficiency
- Improves assimilation of nitrogen
- Increases CO₂ uptake
- Inhibits ethylene
- Keeps leaves greener and healthier
- Induces resistance against viruses and bacteria.

APPLICATION RATES:

<u>CROP</u>	<u>DISEASE</u>	<u>RATE L/HA</u>	<u>DIRECTION FOR APPLICATION</u>
MAIZE	Grey Leaf Spot Northern Leaf Blight Rust	0.8	Apply latest when symptom are first observed on the basal 4-5 leaves and before infection levels reach 5% on the lower leaves. Apply a second application 3 weeks after the first application.
SOYABEAN	Soya Rust Red Leaf Blotch Frog Eye	0.6	Spray preventively before first signs of disease development is noticed (normally at onset flowering) and repeat 21-28 days later. Apply the shorter interval of 21 days when high disease pressure is expected due to weather conditions that favour disease development.

WHEAT	Rust Septoria Leaf Spot Powdery Mildew	0.6 – 0.8	Spray when the first node is above ground at about growth stage 31-33 or at first signs of infection. Apply a second application 3-4 weeks later.
BARLEY	Leaf Spot Powdery Mildew Rust Net Blotch	0.6 - 0.8	Commence spraying latest at the first sign of infection. Apply a second application 3-4 weeks later if high disease pressure occurs.
MACADAMIA	Husk spot, Botrytis, Phytophthora, Cladosorium, Dry flower	90ml/ 100L	Commence application at early flowering or match head stage. Repeat at 21 day intervals. Apply a max. of 3 applications per year. Ensure a fungicide from an alternate chemical group is included in the spray programme.
POTATO	Rhizoctonia	0.5 – 0.6	Apply at planting in a 15-30cm band directing the spray on the soil as it is turned over and around the seed piece.
