

REGUARD 200 SC

A SUSPENSION CONCENTRATE INSECTICIDE FOR THE CONTROL OF TERMITES AND VARIOUS INSECT PESTS IN NUMEROUS CROPS AND GENERAL TERMITE CONTROL IN AND AROUND BUILDINGS.

APPLICATION:

CROP	PEST		APPLICATION DIRECTIONS
BRASSICAS	Diamond Back Moth	25 ml product / 100 l water	Apply as full cover spray in 250 l water/ha
CITRUS Bearing trees	Thrips	7,5 ml product / 100 l water	Apply as a single light cover spray to wet the foliage canopy and fruit uniformly to the point of run-off. Apply at any time between 90–100% petal drop to just before calyx closure. Apply to new growth flush to control thrips damaging the leaves. Do not use more than four times in one year.
COFFEE	White borer	80 ml / 20 l water.	Stem band from base to 1 m up stem. Apply by knapsack/lance at approximately 100 ml/tree ensuring full stem cover. Apply prior to onset of main rains.
COTTON	Termites	500 ml/ha banded 500 ml/ha broadcast	<i>Tractor mounted:</i> Spray over the seed in the furrow in a 150 mm band, just behind the seed distributor to ensure even seed and furrow cover. <i>Knapsack & Lance:</i> Spray in a 150 mm band over the furrow and ensure that immediate covering of the seed is carried out. Use between 100 - 200 lt. Spray volume/ha. Apply as an overall spray during land preparation in approximately 200 litres of spray volume and incorporate immediately to a depth of 100 mm.
EUCALYPTUS	Termites	0,5 ml / tree	Mix the required dose in a minimum of 400 ml water. Clean out the planting hole and spray the interior. Backfill with half the planting soil and drench. Plant seedlings and re-drench with the balance. Ensure that the base of the tree to 10 cm above ground level is wetted. Cover with dry soil.

MAIZE	Snout Beetle Termites	250 ml/ha banded	Apply in 200 mm band over the seed in the planting furrow to ensure even seed and furrow cover.								
		500 ml/ha banded	<u>Tractor mounted:</u> Spray over the seed in the furrow in a 150 mm band, just behind the seed distributor to ensure even seed and furrow cover. <u>Knapsack & Lance:</u> Spray in a 150 mm band over the furrow and ensure that immediate covering of the seed is carried out.								
		750 ml/ha banded	Apply as an overall spray during land preparation in approximately 350 litres of spray volume and incorporate immediately to a depth of 100 mm.								
ORNAMENTALS	Thrips	25 ml product/ 100 l water	Apply as a full cover spray in 250–500 litres water/ha.								
SUGARCANE	Termites	500 ml/ha banded	Spray in a 150 mm band over the setts in the planting furrow and cover immediately. It is recommended that 500 ml of product be applied in 200 litres of spray volume/ha.								
TEA	Termites	0,05 ml/plant (0,694 l/ha- basis 13 888 plants per 1 ha)	Mix the required dose in a minimum of 400 500 ml water. Apply half to the hole. Backfill and drench soil ensuring that the base of the plant 10 cm above ground level is wetted. Cover with dry soil.								
TOBACCO	Termites (Preventative treatment only) 1 litre/ha	LANDS AT PLANTING Premixed in planting water <table> <tr> <td>litres planting water/planting hole</td> <td>3</td> <td>4</td> <td>5</td> </tr> <tr> <td>Regent 200 SC: ml/ 1000 litre water</td> <td>22</td> <td>17</td> <td>13</td> </tr> </table> (based on 15 000 plants/ha) Note: larger volumes of water per planting hole give an increased sphere of protection for plant roots.		litres planting water/planting hole	3	4	5	Regent 200 SC: ml/ 1000 litre water	22	17	13
litres planting water/planting hole	3	4	5								
Regent 200 SC: ml/ 1000 litre water	22	17	13								
General Treatment (Indoor & Outdoor)	Termites 250ml/100L	Apply 500ml of mixture per m2 with suitable equipment that is in good working order and correctly calibrated to give the desired coverage for that particular method of application									

Cup application: Mix 222ml REGUARD 200SC per 100 lit water. Apply 30ml cup of this mixture into planting hole.
