

REVIVAL 100 SC

A RESIDUAL INSECTICIDE FOR THE CONTROL MOSQUITOES, BITING FLIES COCKROACHES AND OTHER INSECTS IN DOMESTIC AND PUBLIC BUILDINGS. CAN BE USED FOR THE TREATMENT OF MOSQUITO NETS TO CONTROL MOSQUITOES AND OTHER BITING INSECTS.

General Information:

REVIVAL® 100 CS is a long-lasting capsule suspension, contact and stomach insecticide for the control of malaria vectors, flies, cockroaches, bedbugs, fleas, fish moths, mosquitoes, ants, and other pests in domestic and public buildings. REVIVAL® 100 CS has low toxicity and spray mixture is colourless and odourless and can be used indoors or outdoors, in and around homes, factories, hotels, shops, food handling and processing establishments, hospitals, schools, dairy parlours, piggeries, stables, poultry houses, dog kennels, refuse dumps and similar places where high levels of hygiene are required. The length of control depends on:

- the insect species being treated,
- the level of infestation,
- the type of surface (or bed-net fabric),
- whether the treatment is applied indoors or outdoors,
- exposure to sunlight and weather conditions and,

Indoor Residual Spraying

Dosage	Comments
62.5 ml of REVIVAL® 100 CS in 10 litres of water to cover 200 to 250m ²	The spray mixture should be applied to just before then point of run-off, equivalent to 1 litre of the mixture per 20m ² . This rate will give excellent control of mosquitoes, flies and cockroaches. Ensure total coverage of all surfaces. All cracks, crevices and potential hiding places where mosquitoes may seek shelter must receive special attention. Allow spray to dry on treated surfaces before re-entering.

Method of Application

All spray applications must be made with knapsack sprayer or any other suitable equipment that is in good working order and correctly calibrated to ensure the desired coverage for that particular method of application. The premises may be reoccupied as soon as the spray is dry.

Mosquito-nets

- All nets need to be washed and dried before treatment. Ensure that all traces of soap are rinsed out after washing and before treating with REVIVAL® 100 CS, as alkaline soap residues could influence the persistence of the treatment.
- The volume of REVIVAL® 100 CS to be used per bed-net is dependent on the length of time that control is required, as well as the size of the net.

Months of control required (dose active ingredient)	Single bed-net (±12 m ²)	Double bed-net (±16 m ²)	Queen size bed-net (±20 m ²)	King size bed-net (±24 m ²)
4 – 6 months (20mg a.i./ m ²)	2.5 ml	3.5 ml	4.0 ml	5.0 ml
more than 9 months (40mg a.i. / m ²)	5.0 ml	7.0 ml	8.0 ml	10.0 ml
